HTR-Number and finish abbreviation

PRODUCT DESCRIPTION

Warmup® Towel Warmers were designed and built with simplicity in mind. Constructed of high quality 304 stainless steel, expertly welded in unique designs, Warmup towel warmers are safe and easy to use.

While most of our models require hard-wiring to a power source they do not require a control.

Our proprietary heating technology inside the towel warmer will ensure the device reaches 145°F degrees in 3 minutes. If your goal is to get the comfort of a nice warm towel after the bath or shower, then wire it to your light switch. By the time you're done, your towel will be wonderfully warm. If the plan is to dry the towels faster in an active household or prevent the discomfort of moldy towels in a poorly ventilated space, then wire it to a separate switch which you can leave on separately from the lights or fan.

Mounting the towel warmer is very simple. Make sure to read the Instruction Manual for the do's and don'ts and solicit the help of qualified tradesmen when necessary.

SPECIFICATIONS

UL Product Spec: E486964

CODE	TUBE SHAPE	BARs	FINISH	VOLTAGE	AMPERAGE	RESISTANCE
